

AMENDMENTS TO THE SPECIFICATION

Paragraph beginning at page 2, line 24:

61 Japanese Unexamined Patent Publication No. 9-214467, ~~which corresponds to~~
~~United States patent application No. 9523760.8 filed on November 21, 1995,~~ has
suggested a base station used in CDMA wireless local loop system. The base station uses
diffusion codes perpendicular to each other in links in forward and reverse directions
between the base station and a subscriber station. The base station includes a controller
which controls a subscriber station such that a signal received from the subscriber station is
in synchronization with the diffusion codes in a chip period.
